

# Set Up Wi-Fi on a BlackBerry

First you will need to turn on the Wi-Fi.

Click on **Manage Connections**.

Enable the **Wi-Fi** option.

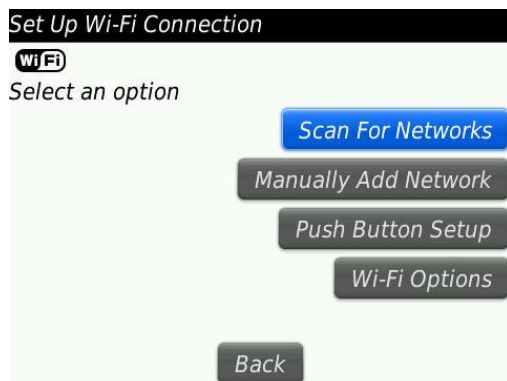

Now go back a step and click on **Set Up**.

Then on **Set up Wi-Fi**.

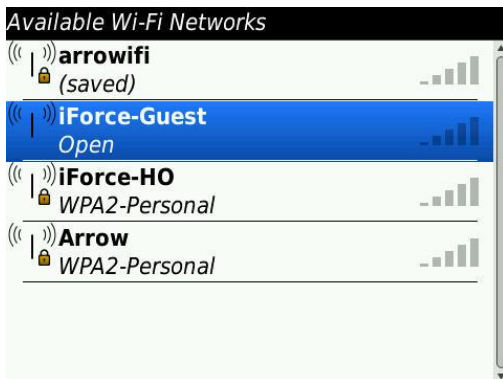

Select **Scan for Networks**.

It will now scan for available Networks.

Once the scan has completed it will display the Wi-Fi Networks available. Click on the Wi-Fi Network you require and click **Connect**.

Depending on the security it may ask for the Pre-Shared Key (PSK). Enter the PSK and click **Connect**. (Speak to your IT administrator for this key).

You should now be connected to Wi-Fi and you will see the Wi-Fi symbol lit up on the main menu.
