

Backup your Data and Restore Nokia

Backup Data

If you require a backup of your data before resetting the phone back to its factory settings please follow the instructions below.

Install the Nokia PC Suite software from either the CD that came with the handset or via www.nokia.com. Use the data cable supplied with the handset and connect one end to your Nokia phone and the other to your laptop/PC.

Open the software which should look similar to below, and click on **Backup**.

Follow the prompts to backup your data onto your laptop/PC and await confirmation that it has been successful.

Restore Data

To restore this data, click on the **Backup** button and then choose **Restore**. You will then need to locate the data file and follow the prompts to restore the data back onto the Nokia device. Again await confirmation that it has been successful.
